RAISE SHIELDS!

AIR-SHIELD LMP from W. R. Meadows is a moisture barrier that cures to form a tough, seamless, elastomeric membrane to prevent air

and water leakage. It may be applied to most common surfaces and integrated into various wall systems. AIR-SHIELD LMP is suitable for both new construction and retrofit applications. It is highly flexible, bridging cracks which may form in the substrate. AIR-SHIELD LMP is also UV resistant and ideal for exposed applications, such as rain screen panels. [For more information on AIR-SHIELD LMP visit www.wrmeadows.com.](http://www.wrmeadows.com)

FROG FASTENER

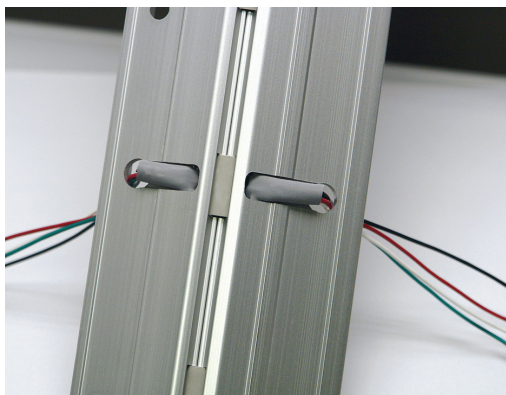

Frog Tape is a patented masking tape with Paintblock Technology, which creates a micro barrier along the edges of the tape. It prevents paint from bleeding and leaves clean lines with no need for retouching. Frog Tape is also resistant to tearing and has a 21-day interior clean release. Frog Tape also comes in its own reusable stay-fresh container that keeps the tape clean and ready to use. [For more information on Frog Tape visit www.frogtape.com.](http://www.frogtape.com)

SOLAR POWERED SYNC UP

Meraki Solar is a self-powered WiFi mesh device. Powered by its own solar panel and solar-charged battery, the Meraki Solar is completely energy independent, making it ideal for providing WiFi coverage in hard-to-wire areas without easy access to power supplies. Each unit is completely self-contained and ready to mount on roofs, walls, poles and anywhere that receives sun exposure. Because Meraki Solar leverages a solar-powered battery; there is no need to touch the local electrical infrastructure. Outdoor wireless networks can be set up quickly in hard-to-wire areas and without support from third-party electricians. [For more information on Meraki Solar visit www.meraki.com/solar.](http://www.meraki.com/solar)

HIGH-TECH HINGE SELECT Hinges' SL57 hinge is designed for retrofit applications on high-traffic doors. Ideal for repairing sagging doorways equipped with electrical devices, the SL57 hinge is a full-surface geared continuous hinge that fully conceals wiring to carry continuous electric current between the frame and the door. The SL57 hinge is performance-proven, enduring more than 25 million cycles in independent lab testing—equal to about 50 years of high-traffic use. SELECT backs its geared continuous hinges with a Continuous Warranty™. It covers any failure of its geared hinges under normal use with no expiration date. [For more on the SL57 hinge visit www.select-hinges.com.](http://www.select-hinges.com)
