SHEAR ADVANTAGE The Timberline TBL1000 Tree Shear from Sidney Manufacturing is a safe, fast tool for selectively cutting, pruning and trimming trees. Timberline Tree Shears offer many advantages when it comes to removing unwanted trees; including the ability to rotate after the cut to serve as a grapple to lift, wrangle and carry a fallen tree. The TBL1000 Tree Shear's ability to cut up to a 10-inch diameter tree, provides a reliable solution to most tree cutting situations. Designed to mount to most skid steer loaders, this tool is also productive as a compact excavator.

WATER WISE Activeion Pro, from Activeion Cleaning Solutions, is a versatile, hand-held cleaner ideal for use on glass, stainless steel, wood, stone and marble, as well as carpet and clothing. Activeion Pro uses activated water technology, rather than harsh chemicals to clean, making it a safe option. Activeion Pro works by applying a slight electrical charge to tap water inside the bottle. The charged water helps lift the dirt from surfaces like a magnet, enabling it to be wiped away. The activated water is completely safe, returning to its original, non-electrically charged, tap water state after 30 to 45 seconds.

THE PRESSURE IS ON The 895SS Hot Water Pressure Washer from Hotsy is portable and compact, yet big on cleaning power. Ideal for construction and waste management, the 895SS boasts a powerful 8.2 horsepower motor. Other features include pneumatic tires with inner tubes for easy maneuverability, a pressure relief valve that protects the pressure washer and user from thermal expansion, and a control panel with adjustable temperature control and heavy-duty heater and pump motor switches.

WONDER WALL The Vitrulan wall system is a durable wall covering made from woven glass fabric. Vitrulan wall systems create a smooth, attractive surface that prevent dry-wall cracks in new buildings and cover existing cracks in older buildings. Vitrulan products can be cleaned or simply repainted with minimal wall repair, when needed. Enhanced resistance coatings can also be added to help avoid unsightly minor dents and scratches in extreme high traffic areas.

Vitrulan glass fabric wall systems are chlorine-free, emit low volatile organic compounds and have a high permeability rating, making them ideal for hygiene-sensitive areas like healthcare and assisted living facilities.
