Sorabh Khurana is an executive technology leader with several years of experience in roles such as **CTO, Sr. Director, and product & engineering leader**, driving transformation across **AI, IoT, edge computing, and cloud platforms.** Since 2013, he has been deeply engaged in the **data and AI journey**—from launching **smart home and smart building platforms that enabled outcomes across commercial buildings, smart cities, hospitals, multifamily, airports, and data centers**, to scaling digital twins, and now advancing **GenAI, RAG, and agentic AI** solutions.

He has led large-scale initiatives at Honeywell Forge, Johnson Controls OpenBlue, JLL, Medtronic, and Optum, while also contributing to **startup growth and M&A integration**, bringing agility and innovation into enterprise ecosystems. His career spans **residential, commercial, and healthcare domains**, where he has built platforms that unify complex systems, create new revenue streams, and enable intelligent, human-centric environments.

A proven **transformative leader**, Sorabh combines **enterprise scale experience, startup agility, and modern AI expertise** to deliver global platforms that are intelligent, adaptive, and aligned with long-term business outcomes.
