

Spencer Burton is the Co-Founder and CEO of CRE Agents, a Vertical AI Agentic Platform changing how work gets done in commercial real estate. With over 20 years of experience as a fiduciary, principal, and founder in real estate, he is a recognized expert in applying AI to CRE. His mission at CRE Agents is to give people back life's most precious asset—time. By pushing repetitive tasks to AI-driven "digital coworkers", CRE Agents empowers professionals to focus on high-impact work, driving better returns and more fulfilling careers.

Prior to CRE Agents, Spencer served as President and founding team member of Stablewood, a multi-strategy institutional real estate investor leveraging AI, machine learning, and data analytics. At Stablewood, he co-developed an AI-enabled digital coworker that underwrote and created investment memos for 50,000+ CRE transactions, equating to four years of work for 20 full-time analysts.

Spencer is also the co-creator of Adventures in CRE (A.CRE), the industry's leading platform for financial modeling, education, AI learning, and career development. Through A.CRE, he's trained thousands of professionals at some of the world's top companies and universities. Spencer has built a reputation as an innovator and thought leader in CRE. He has held senior roles at top institutional firms, helped launch two successful startups, and deployed automation across brokerage, development, acquisitions, debt production, and management. Spencer's holds a Bachelor's in International Affairs with an emphasis in economics from Florida State University and a Master's in Real Estate with a concentration in finance from Cornell University."
