# TABLE OF CONTENTS

## Chapter 1: Why Real Estate Finance?

- Owner's Goals and Objectives .................................................. 2
- The Role of the Real Estate Manager ........................................ 6
- Review Questions ....................................................................... 7

## Chapter 2: Economics of Real Estate Investment

- Business and Real Estate Cycles ............................................... 9
- Macroeconomic Effects on Real Estate ..................................... 12
  - Inflation ................................................................................. 12
  - Consumer Price Index (CPI) ................................................ 13
  - Interest Rates ...................................................................... 13
- Macroeconomic Trends ............................................................ 15
- Unemployment and Foreclosures ............................................. 15
- Interest Rates Decline .............................................................. 15
- RE Value Rises / Income is Higher Relative to Debt ................. 15
- Foreign Investment ................................................................... 18
- Review Questions ..................................................................... 18

## Chapter 3: The Finance Function

- Real Estate Management Company Structures ....................... 19
- The Accounting Function ......................................................... 20
  - In-House or Outsource ....................................................... 21
- Accounting Personnel .............................................................. 22
- Accounting Departments in Small and Large Offices .......... 24
- Accounting Requirements by Property Types ....................... 25
  - Rental Apartments .................................................................. 25
  - Condominiums .................................................................... 25
  - Office Buildings and Industrial Parks .................................. 25
  - Shopping Centers ................................................................ 26
- Establishing Financial Policies and Procedures ....................... 26
- Ethical Management and Protection of Funds ......................... 28
  - Trust Accounts .................................................................... 29
  - Agency Accounts ................................................................ 29
- Review Questions .................................................................. 30
Chapter 4: Accounting Basics

Types of Accounting
- Cash-Basis Accounting
- Accrual-Basis Accounting
- Modified Accrual Accounting

Generally Accepted Accounting Principles (GAAP)
- Using and Creating a Chart of Accounts

Review Questions

Chapter 5: Understanding and Implementing Budgets

Top Four Purposes of a budget
Types of Budgets
- Budget Timelines

Forecasting
- History-Based Forecasting
- Percentage Increase
- Consumption × Rate
- Zero-Based Budgeting

Choosing a Forecasting Method
- Forecasting Tools

Variance Analysis

Budgeting Ethics and Decision making

Tools and Conventions for Budgeting

Budgeting Exceptions
- Real Estate Tax Valuation
- Real Estate Tax Timing
- Insurance
- Contracts
- Utilities
- Payroll
- Collective Bargaining Agreements
- Capital Expenditure vs. Operating Expense

Review Questions

Chapter 6: Cash Flow Analysis

Significance of NOI and BTCF
Components of the Pro Forma Statement
- Gross Potential Income (GPI)
- Loss to Lease
- Vacancy and Collection Loss
- Net Rent Revenue

## Table of Contents

- Income Capitalization Approach .................................................. 217
- Capitalization Rate (R) ................................................................. 218
- Using IRV to Calculate the Cap Rate ............................................. 219
- Going-In and Going Out Cap Rates .............................................. 220
- Final Value Estimate .................................................................... 221
- Deriving the Capitalization Rate ..................................................... 222
  - Built-Up Capitalization Rate ....................................................... 223
  - Comparable Sales Analysis ....................................................... 224
  - Mortgage Equity Analysis ......................................................... 226
- Equity Capitalization and Investment Value .................................. 228
- Ethical Valuation .......................................................................... 230
- Real Estate Manager’s Impact on NOI and Value ......................... 231
  - Creating a Market-Based Budget .............................................. 231
  - Carefully Budgeting Expenses ............................................... 232
  - Careful Analysis of Expenses and Capital Improvements .......... 233
  - Effective Long-Term Planning ................................................. 234
- Review Questions .......................................................................... 234

### Chapter 12: Measuring the Performance of Real Estate Assets 237

- Measuring Investment Return ...................................................... 240
  - Test One: Cash-on-Cash Rate of Return .................................... 240
  - Test Two: Value Enhancement ................................................. 241
  - Test Three: Net Present Value (NPV) ....................................... 242
  - Test Four: Internal Rate of Return (IRR) ................................. 243
  - The Relationship Between NPV and IRR .................................. 245
  - Modified Internal Rate of Return (MIRR) ............................... 246
- Review Questions .......................................................................... 247

### Chapter 13: Discounted Cash Flow ........................................ 249

- Elements of DCF analysis .............................................................. 250
- Calculating market value with DCF ............................................. 252
  - Step 1: Forecast the NOI ............................................................ 252
  - Step 2: Estimate Terminal Value .............................................. 252
  - Step 3: Calculate Sales Proceeds ............................................. 252
  - Step 4: Build a T-bar of All Cash Flows .................................... 254
  - Step 5: Select a Discount Rate ................................................ 254
  - Step 6: Sum Discounted NOIs ................................................ 254
- Calculating Investment Value ...................................................... 258
  - Part A: Estimate Equity Value .................................................. 258
  - Part B: Determine Lender Interest ............................................ 260
- Review Questions .......................................................................... 262
# Chapter 14: Financial Analysis and Making Recommendations 263

Before Tax Cash Flow Analysis: Purchase .................................................. 263
Midstream Analysis ....................................................................................... 267
Performing a Midstream Analysis ................................................................. 272
Analyzing Property Alternatives ................................................................. 275
Example of Midstream Analysis of Alternatives ...................................... 277
   As-Is (Alternative One) ................................................................. 277
   Alternative Two .............................................................................. 279
   Alternative Three .......................................................................... 280
Recommending a Course of Action ............................................................. 282
   Example: Making a Recommendation .......................................... 283
Payback Period ............................................................................................ 284
Review Questions ....................................................................................... 286

# Chapter 15: Lease Analysis 287

Lease Concessions and Effective Rent (Short-Term and Long-Term Leases) .... 287
   Short-Term Leases ............................................................................. 288
   Long-Term Leases ............................................................................. 288
Actual vs. Effective Rent ............................................................................ 291
Discount Rates ........................................................................................... 293
Lease Buyouts ............................................................................................ 294
Comparing Lease Proposals ...................................................................... 297
Review Questions ....................................................................................... 298

# Chapter 16: After-Tax Cash Flow 299

Income Tax on Operations ........................................................................... 299
   Income Deductions .......................................................................... 300
   Cost Segregation .............................................................................. 301
   Before-Tax Cash Flow vs. Taxable Income ..................................... 303
   Passive Income .................................................................................. 303
   Exemptions and Exceptions ............................................................. 306
   Income Tax Savings/Payable Steps ............................................... 308
   Example: Applying Tax Savings/Payable Steps .................................. 308
Capital Gains Tax ....................................................................................... 311
   Basis .................................................................................................. 312
   Allocating Basis ............................................................................... 312
   1031 Exchanges ............................................................................... 313
   Tenants in Common Exchanges ........................................................ 313
   Calculating Capital Gains Tax ............................................................ 314
   Example: Applying Tax Due on Sale ................................................. 315
Example: After-Tax Cash Flow Analysis ................................................................. 318
What About Tax Credits? ...................................................................................... 323
Review Questions ................................................................................................. 325
